WHAT IS CCS?

A recovery focused behavioral health program for children and adolescents with mental illness, substance use disorders and/or severe emotional disturbance.

- Provides individualized, participant-centered service plans.
- Features a recovery based approach that includes family and other support.
- Is a community based program where most services are provided in the participant's home and local community.

Services are provided at no cost to participants.

PROGRAM SERVICES

Services are determined through assessment and individualized service planning.

Services Plans may include:

- Communication and interpersonal skills training
- Diagnostic evaluations and specialized assessments
- Medication management
- Physical health education, support and monitoring
- Social development and behavior modeling
- Individual and family psychotherapy; in the home, at school, or the CCS office
- Recovery education and illness management
- Substance abuse treatment
- Crisis prevention and management
- Education, training, and support for family members
- Support for an attainment of educational goals
- Mentoring
- Coordination with current providers and therapists

CCS VISION IS:

A flexible wraparound model that is directed by the youth and their family/guardians.

Services support the youth successful living in their community and access to health, education, social, spiritual and recreational resources.

Promotes meaningful participation of participants with family/guardians and chosen support systems.

Provides participants the skills to take better control of their lives they develop into adult citizens.

Identify service resources that build skills to allow participants to take responsibility for their decisions and actions that meet the needs of participants and their families.
